

Rabbit Adoption Application

This application will be used to screen potential adopters. We want to make sure we have placed our rabbits in the best home possible. We thank you for your interest to save a rabbit.

Adopting a rabbit is a 10 to 12 year commitment. Adopting a rabbit for a child is not a good idea as the child's priorities may change over time. Adults need to understand that they will more than likely be the primary caregiver of the rabbit. Rabbits need time, attention, and a play area as they are social animals and need exercise. If you cannot commit to this, a rabbit may not be the best per for you.
